WRITING A SIMPLE SLIDE

Title, subtitle, body text

- The frame title sits in a solid navy band, white and uppercase
- The BSC logo lives in the footline, bottom-left
 - Sub-bullets use a hollow circle marker
 - Nested further, markers become a filled square
- Body text is plain black on white for readability
- Use alert to bring focus to something, in navy

PART TWO

TWO-COLUMN CONTENT

Text alongside a figure

- Use columns for text/figure layouts
- The BSC logo lockup is bundled in `assets/`
- Swap `assets/bg-section.jpg` for a presentation-specific section-slide photo via `\setbscsectionphoto{...}`

Drawback 3

LEFT CONTENT FIRST, THEN THE REST

A horizontal two-step reveal: text first, image added

Placeholder text for the part of the slide that's on screen from the start – swap this for whatever should be visible on step 1.

LEFT CONTENT FIRST, THEN THE REST

A horizontal two-step reveal: text first, image added

Placeholder text for the part of the slide that's on screen from the start – swap this for whatever should be visible on step 1.

A SINGLE SENTENCE ALONGSIDE A FIGURE

Text/figure variant: short claim, large figure

Short claim the figure backs
up, in a **narrow** column
